OIL & GAS COMMISSION

**ORDER NO. 035-2025-06** **July 23, 2025**

**PINE BRINE PRODUCTION UNIT**
*Miller and Lafayette Counties*

After due notice and public hearing in Magnolia, Arkansas, on June 23, 2025, the Arkansas Oil and Gas Commission, in order to prevent waste, carry out an orderly program of development, and protect the correlative rights of each owner in this Brine Unit, finds the following facts and issues the following Order.

## STATEMENT OF THE CASE

**Saltwerx LLC** (hereinafter referred to as the "Applicant") filed its application for a Commission Order establishing fair and equitable compensation for lithium extracted from brine produced from the Pine Brine Production Unit.

## FINDINGS OF FACT

Based upon the application filed, the exhibits as introduced and made a part of the record inclusive of those offered on behalf of the Commission, and other evidence presented by Applicant in said proceeding, the Commission finds that:

1. In Order Reference No. BU 024-2025-04, the Commission established the Pine Brine Production Unit (hereinafter referred to as the "Brine Unit") for the production of brine from the Smackover Lime Formation in conformity with a plan of development and operation. Applicant is the designated operator of the Brine Unit.

2. The legal description of the lands presently included in the Brine Unit is as follows:

   All of Sections 29, 30, 31 and 32, Township 17 South, Range 23 West; and all of Sections 6, 7, 18, 19, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35 and 36, Township 17 South, Range 24 West; and all of Sections 1, 2, 3, 4, 9, 10, 11, 12, 13, 14, 15, 16, 21, 22, 23, 24, 25, 26, 27, 28, 33, 34, 35 and 36, Township 17 South, Range 25 West; and all of Sections 5, 6, 7, 8, 17 and 18, Township 18 South, Range 23 West; and all of Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17 and 18, Township 18 South, Range 24 West; and all of Sections 1, 2, 3, 4, 9, 10, 11, 12, 13 and 14, Township 18 South, Range 25 West; and all of Sections 30 and 31, Township 16 South, Range 24 West; and all of Sections 25, 26, 27, 28, 33, 34, 35 and 36, Township 16 South, Range 25 West, containing 56,245.58 acres of land, more or less, being as shown on the Unit Plat attached and labeled Exhibit A.

3. The brine owners and holders of brine leases within the Brine Unit are listed in Applicant's Exhibit "B" which is attached to this Order.

4. Ark. Code Ann. § 15-76-315(a) requires that Applicant pay what Applicant termed a "Brine Fee" when it produces brine. The "Brine Fee" must be paid to brine owners upon the production of brine, regardless of whether or to what extent additional substances may subsequently be extracted from the brine.

5. Ark. Code Ann. § 15-76-315(c)(1) requires that, in addition to any other amounts due and owing by the producer or producers of any unit to the owners therein, the producer or producers shall account separately and on a fair and equitable basis to each owner in the unit for all substances which are found by the commission to be profitably extracted from brine by a producer and which were not extracted by a producer on January 1, 1979.

6. In Order No. 024-1-2025-04, the Commission found, after a hearing with proper notice and evidence presented, that Applicant can profitably extract lithium from brine in the Pine Brine Unit.

7. Applicant proposed the following methodology for calculating fair and equitable compensation for brine owners when Applicant profitably extracts lithium from brine in the Brine Unit: **Compensation Payment = Product Quantity × Price × Compensation Rate × Brine Owners' Interest.**

   A. **Product Quantity:** In establishing how a Compensation Rate is applied, the mineral's point of production or extraction to the surface is typically utilized (i.e., oil at the wellhead). In this case, however, neither brine nor lithium ions, at their low concentrations, have any value at the wellhead or point of extraction. The value to be realized from lithium extraction will come from the solid specialty products manufactured from the extracted lithium ions. Such specialty products include lithium carbonate, lithium hydroxide, lithium oxide, and other lithium product derivatives. These products differ from one another. However, their respective lithium content can be measured by comparing their unique molecular lithium concentrations to that within lithium carbonate, thus establishing a standard comparative basis known as a lithium carbonate equivalent (LCE), which is utilized throughout the market and industry. The product quantity used in the compensation calculation shall be that of the first marketable product produced converted to LCE. Exhibit C of the application, attached hereto and made part hereof, is a chart showing the calculated LCE value of various lithium containing end-products.

   B. **Price:** Establishing a connection between a market price and compensation, as opposed to a mere per-acre payment, ensures the alignment of interest and proportional value sharing between developers and brine owners throughout the life of a development. However, it is not feasible to use the Applicant's actual sales proceeds from the sales of diverse specialty products as a basis for compensation calculation. Actual sales price data for products is considered confidential and/or trade secret information. Publicizing actual sales prices for products presents potential antitrust concerns and could disadvantage the brine industry development in South

Arkansas. It should be noted that, in normal industry practice, actual sales price is lower than the available index price.

Rather, a market-based index, which protects Applicant's proprietary information while still directly associating fair and equitable compensation with a market value basis, should be utilized. The Commission has determined that the appropriate index for valuation resides in the first marketable product, lithium carbonate, represented by the technical grade lithium carbonate index for North American markets published by Fastmarkets. That index, adjusted for each manufactured product in accordance with its LCE value, represents a fair and equitable value of such product with connected market transparency and consistency, while protecting the producers' proprietary product and confidential marketing information and providing uniformity among brine owners. Additionally, this technical grade index is the most appropriate value measurement because it represents the first marketable product in the variety of lithium containing products or derivatives. While indices exist for the valuation of other grades or derivatives of lithium-containing products, such product indices reflect incremental value from further refining and manufacturing beyond the value contributed by the base lithium element. The value determination shall be made quarterly, in compliance with Ark. Code Ann. §15-76-315(c)(3), using the quarterly average of that index's daily spot market prices.

C. **Compensation Rate:** The proposed compensation rate must be competitive in a global market in order to enable the development of lithium resources in Arkansas. An examination of global lithium compensation rates reveals a variety of arrangements for compensating resource owners. A report summarizing available data concerning relevant global lithium compensation benchmarks was attached to the Application as “Exhibit D.” For Arkansas' deep brine resources, which leverage emerging technologies and significant processing to create marketable lithium specialty products, a 2.50% rate shall be used as the ongoing rate.

D. **Brine Owner's Interest:** Fair and equitable compensation applicable to the extraction of lithium shall be distributed to the brine owners within the Brine Unit based upon each such owner's proportional net acreage therein. This is consistent with existing methodologies in Arkansas for brine and additional substances within the brine.

8. On May 28, 2025, in Docket No. 032-2025-05 associated with the Reynolds Unit, the Commission established that a royalty payment calculation methodology, consistent with the above method, is fair and equitable for the extraction of lithium as an additional substance from brine. Applicant asserts that the approved compensation method for the Reynolds Unit fairly accounts for unit-to-unit differentiation as it relates to mineral value (e.g., reservoir quality, unit size, and production volume). Thus, Applicant states that the 2.50% royalty rate stands as a consistent, fair, and equitable precedent applicable to the Pine Brine Production Unit as a basis of compensation for regional mineral owners.

9. The Commission finds that the above royalty methodology and basis is further supported by third-party benchmarking analysis, Saltwerx's leases, and information previously provided in Reference Docket No. 050-2024-09.

10. The following matters are incorporated by reference as a part of the record with respect to this application: Docket No. 050-2024-09, Docket No. 083-2023-10, Docket No. 032-2025-05, and Docket No. 024-2025-04.

11. The following person(s) appeared at the hearing, submitted comments, or submitted objections:

    Adam Clark on behalf of BRP LLC, Polly and Dan Foote, Debi Tietjen, Frances Deane Alexander, Kelli Souter on behalf of the Magnolia Community Development, W. D. Gibbs on behalf of Mission Creek Resources, LLC, Pamela J. Givens, G. Alan Perkins on behalf of the South Arkansas Minerals Association, Steven Givens, Laura Clark on behalf of the University of Arkansas Hope-Texarkana, Korey Keith on behalf of Bodcaw Bank, Venesha Sasser on behalf of the Lafayette County Leadership Council, Chamber of Commerce, and Walnut Hill Communications, Arthur Orduna on behalf of the Venture Center and LiTHIUMWORKS, Cathy Hardin Harrison – County Judge of Miller County, LaTwon Whitby, Evetta Whitby, TaJuan Whitby, Anna Powell on behalf of the Hempstead County Economic Development Corporation, Randy Zook on behalf of the Arkansas State Chamber of Commerce, Lauren Waldrip on behalf of the Arkansas Advanced Energy Association, and Dr. Robin Hickerson on behalf of the Texarkana USA Chamber of Commerce.

## CONCLUSIONS OF LAW

1. That due notice of public hearing was given as required by law and that this Commission has jurisdiction over said parties and the matter herein considered.

2. That this Commission has authority to grant said application under the provisions of Act No. 937 of 1979, as amended.

## ORDER

It is, therefore, ordered by the Commission that:

1. Applicant shall pay the "Brine Fee" to underlying brine owners upon the production of brine from the Brine Unit, and, in addition, account to the underlying brine owners separately and on a fair and equitable basis for lithium that it profitably extracts from the brine produced from the Brine Unit using the following formula:

   **Compensation Payment = Product Quantity × Price × Compensation Rate × Brine Owners' Interest**

A. **Product Quantity:** In establishing how a Compensation Rate is applied, the mineral's point of production or extraction to the surface is typically utilized (i.e., oil at the wellhead). In this case, however, neither brine nor lithium ions, at their low concentrations, have any value at the wellhead or point of extraction. The value to be realized from lithium extraction will come from the solid specialty products manufactured from the extracted lithium ions. Such specialty products include lithium carbonate, lithium hydroxide, lithium oxide, and other lithium product derivatives. These products differ from one another. However, their respective lithium content can be measured by comparing their unique molecular lithium concentrations to that within lithium carbonate, thus establishing a standard comparative basis known as a lithium carbonate equivalent (LCE), which is utilized throughout the market and industry. The product quantity used in the compensation calculation shall be that of the first marketable product produced converted to LCE. Exhibit C of the application, attached hereto and made part hereof, is a chart showing the calculated LCE value of various lithium containing end-products.

B. **Price:** Establishing a connection between a market price and compensation, as opposed to a mere per-acre payment, ensures the alignment of interest and proportional value sharing between developers and brine owners throughout the life of a development. However, it is not feasible to use the Applicant's actual sales proceeds from the sales of diverse specialty products as a basis for compensation calculation. Actual sales price data for products is considered confidential and/or trade secret information. Publicizing actual sales prices for products presents potential antitrust concerns and could disadvantage the brine industry development in South Arkansas. It should be noted that, in normal industry practice, actual sales price is lower than the available index price.

Rather, a market-based index, which protects Applicant's proprietary information while still directly associating fair and equitable compensation with a market value basis, should be utilized. The Commission has determined that the appropriate index for valuation resides in the first marketable product, lithium carbonate, represented by the technical grade lithium carbonate index for North American markets published by Fastmarkets. That index, adjusted for each manufactured product in accordance with its LCE value, represents a fair and equitable value of such product with connected market transparency and consistency, while protecting the producers' proprietary product and confidential marketing information and providing uniformity among brine owners. Additionally, this technical grade index is the most appropriate value measurement because it represents the first marketable product in the variety of lithium containing products or derivatives. While indices exist for the valuation of other grades or derivatives of lithium-containing products, such product indices reflect incremental value from further refining and manufacturing beyond the value contributed by the base lithium element. The value determination shall be made

quarterly, in compliance with Ark. Code Ann. §15-76-315(c)(3), using the quarterly average of that index's daily spot market prices.

C. **Compensation Rate:** The proposed compensation rate must be competitive in a global market in order to enable the development of lithium resources in Arkansas. An examination of global lithium compensation rates reveals a variety of arrangements for compensating resource owners. A report summarizing available data concerning relevant global lithium compensation benchmarks was attached to the Application as "Exhibit D." For Arkansas' deep brine resources, which leverage emerging technologies and significant processing to create marketable lithium specialty products, a 2.50% rate shall be used as the ongoing rate.

D. **Brine Owner's Interest:** Fair and equitable compensation applicable to the extraction of lithium shall be distributed to the brine owners within the Brine Unit based upon each such owner's proportional net acreage therein. This is consistent with existing methodologies in Arkansas for brine and additional substances within the brine.

2. The record of the proceedings in the following matters are hereby incorporated by reference as part of the record with respect to the application: Docket No. 050-2024-09, Docket No. 083-2023-10, Docket No. 032-2025-05, and Docket No. 024-2025-04.

This Order shall be effective from and after **July 23, 2025**, and the Commission shall have continuing jurisdiction for the purposes of enforcement, and/or modifications or amendments to the provisions of this Order.

ARKANSAS OIL AND GAS COMMISSION

Alan J. York
Director

## EXHBIIT A

### Pine Brine Production Unit - Legal Description

The Unit consists of the following described real property located in Lafayette and Miller Counties, Arkansas to wit:

All of Sections 29, 30, 31 and 32, Township 17 South, Range 23 West; and all of Sections 6, 7, 18, 19, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35 and 36, Township 17 South, Range 24 West; and all of Sections 1, 2, 3, 4, 9, 10, 11, 12, 13, 14, 15, 16, 21, 22, 23, 24, 25, 26, 27, 28, 33, 34, 35 and 36, Township 17 South, Range 25 West; and all of Sections 5, 6, 7, 8, 17 and 18, Township 18 South, Range 23 West; and all of Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17 and 18, Township 18 South, Range 24 West; and all of Sections 1, 2, 3, 4, 9, 10, 11, 12, 13 and 14, Township 18 South, Range 25 West; and all of Sections 30 and 31, Township 16 South, Range 24 West; and all of Sections 25, 26, 27, 28, 33, 34, 35 and 36, Township 16 South, Range 25 West, containing 56,245.58 acres of land, more or less

## EXHIBIT C

### LCE Value of Various Lithium Containing End-Products

The following table represents the mass conversions for several lithium-containing compounds relative to an LCE. Example: 1.000 kilograms (kg) of lithium hydroxide monohydrate is equivalent to 0.881 kg of lithium carbonate, based on the lithium mass conversion.

| Original Compound | New Compound: Lithium Carbonate |
|---|---|
| Lithium | 5.323 |
| Lithium oxide | 2.473 |
| Lithium carbonate | 1.000 |
| Lithium hydroxide | 1.543 |
| Lithium hydroxide monohydrate | 0.881 |
| Lithium chloride | 0.870 |
